INFO

Gillette produced in Egypt blades with names London Bridge, Nacet and (in latest years) Gillette. It is important to know that Gillette used very similar packaging (as part of globalization) and in factories of other countries (e.g. Mexico, Poland, Czech Republic, Russia). London Bridge is name used in many Gillette factories (f.e in Great Britain, Brasil, Spain, South Africa, Chile ...)

<p>Packaging in the "Gillette" pattern has technologically justified fragments from other packaging. Packages in the center of the sheet have four -these on the side, top or bottom of the sheet, two in the appropriate side. So there are five variants. Because there are collectors who collect it - I will mark it in the catalog number after the dash.</p>
